Power Direct Sales, Better Manage Operations and Scale Your Business

Our Hotel API has been designed to cover all real-time requirements of small-medium travel agents and bigger brands alike. Once it is integrated into your website, it will allow your clients and your travel business to access great variety of services.

- It is fast, reliable and straightforward to implement. It allows you to integrate an entire hotel inventory within your own website or application.
- It provides details including type of room with images, book/cancel rooms, generates reports of booking and cancellation.
- It enables online travel agencies or agents to use global travel content such as hotel data, pictures, room details, rates from various suppliers.
- It provides complete control over the pricing of the inventory and helps efficiently manage revenue.
- It allows you to add live pricing and booking functionality, eliminating the need to deal with multiple supplier integrations.

Smart Features:

- Simple to use
- Boost your online direct sales
- Real-time monitoring
- Easy markup controls
- Search, book, confirm-with a single API Integration
